

## **Planning Report to the Consultative Committee**

**8<sup>th</sup> June 2016**

### **1. City Airport Development Programme (CADP) Update**

Good progress has been made discharging the pre-commencement conditions on the CADP planning permission. These must all be approved before any works can commence.

To date the details associated with 39 of the 42 conditions have been approved with the remaining three expected to be approved by the end of June.

Work continues in preparation for beginning construction of CADP with a Delivery Partner expected to be appointed in the coming weeks.

### **Planning Compliance**

A draft of the Airports 2016 Annual Performance Report (APR) has been shared with London Borough of Newham (LBN) and subject to comment will be published on the LCACC website before the end of July.

LBN recently approved a new rolling programme of compliance meetings with the Airport under the CADP Section 106 Agreement, this will ensure that performance against the many obligations and conditions on the CADP permission are adequately monitored and communicated to LBN throughout the year and ahead of the publication of the APR

### **Consultation on a new Aircraft Noise Categorisation Scheme**

As previously presented to committee members London City Airport is opening a public consultation on new proposed measures to manage aircraft noise by incentivising airlines to minimise noise. The proposed scheme is known as the new Aircraft Noise Categorisation Scheme and will ensure that no noisier aircraft than currently operate at London City will be allowed to operate in future.

The consultation will run from 2 June to the 14 July. Individuals, businesses and interested parties are welcome to review the proposals at: [www.londoncityairport.com/ANCS](http://www.londoncityairport.com/ANCS)

Email responses can be sent to [ANCS@londoncityairport.com](mailto:ANCS@londoncityairport.com) Written responses can be posted to: ANCS Consultation, City Aviation House, Hartmann Road, E16 2PB

Once the consultation is concluded, all responses will be considered and a final proposed scheme will be submitted for approval by London Borough of Newham in autumn 2017. Further details will be provided to the Committee at the meeting.

**Tim Halley, Head of Planning**
